Profile Summary

Aspiring Full-Stack .NET Developer and MCA student with a strong foundation in C#, ASP.NET Core, Object-Oriented Programming (OOP), SQL Server, and software development concepts. Developed full-stack web applications using ASP.NET Core Web API, React.js, Entity Framework Core, and SQL Server following layered architecture and REST API principles. Familiar with Git, GitHub, Postman, and database management. Currently enhancing skills in ASP.NET Core MVC, advanced .NET concepts, and modern web development while seeking an opportunity to build scalable and efficient web applications.

Education

LDRP-ITR, Kadi University

Master of Computer Application (MCA)

CGPA: 9.42 (1st Year)

Kamani Science College, Saurashtra University

Bachelor of Computer Application (BCA)

Percentage: 74.63

K. K. High School

HSC 12th with Commerce

Percentage: 58.53

Gandhinagar, Gujarat

expected May 2027

Amreli, Gujarat

Graduation, March 2025

Amreli, Gujarat

HSC Completion, May 2021

Projects

AlIEdit Desktop | [Code](#)

May 2026

Tech Stack: . C#, .NET 8, WPF, XAML, MVVM, LibreOffice, Ghostscript

- Built an all-in-one file conversion and editing desktop application using .NET 8, WPF, and C#
- Implemented PDF merge, split, compression, image conversion, and document conversion features for Word, Excel, and PowerPoint files.
- Integrated LibreOffice and Ghostscript for document processing and file format conversion.
- Designed a modern desktop UI and accelerated development by leveraging AI tools like OpenAI ChatGPT and Claude for code assistance, debugging, and feature implementation

College Event Management System | [Code](#)

Apr 2026

Tech Stack: ASP.NET Core + React

- Implemented user authentication using JWT (Admin, Organizer & Student roles)
- Developed RESTful APIs for event management, registrations, and attendance tracking.
- Enabled students to register for events, organizers to manage events, and admins to oversee the entire system.
- Built responsive user interfaces using React.js and Tailwind CSS.

CCRPortal (Job Portal) | [Code](#)

Dec 2025

Tech Stack: ASP.NET Web Form

- Developed a recruitment portal using ASP.NET Web Forms and SQL Server
- Implemented job posting and application features
- Role base system (admin, student & company)

Technical Skills

Languages & Frameworks: C#, ASP.NET Core Web API, ASP.NET Web Forms, Entity Framework Core

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS

Database: SQL Server

Tools: Git, GitHub, Visual Studio, VS Code, Postman, Swagger

Soft Skills

Problem Solving, Quick Learner, Adaptability
